Professional Summary

UI Architect and Technical Lead with 9+ years of experience designing and **delivering scalable, secure, and high-performance web applications using React.js, Vue.js, and Micro Frontend architecture**. Proven expertise in defining frontend architecture, design systems, and governance models for enterprise-scale banking and lending platforms, including Loan Origination Systems (LOS), mortgage portals, and real-time financial dashboards.

Strong expertise in **Accessibility, Vue 3 Composition API, React Hooks, and modular Micro Frontend architectures** tailored for digital lending and financial analytics platforms. Skilled in collaborating with business teams to translate complex loan workflows and financial rules into intuitive, responsive user interfaces that enhance user experience and operational efficiency.

As a **UI Architect and Technical Lead**, defining component-driven design systems and enforcing development best practices across distributed teams.

Technical Skills

- **Frameworks & Libraries:** React.js version 18 (Hooks, Context API, React Router), Vue.js (Composition API, Vuex, Vue Router), Micro Frontend (Module Federation, Single-SPA).
- **Languages:** JavaScript (ES6+), TypeScript 5, HTML5,
- **State Management:** Redux, Zustand, Vuex, Pinia,
- **Styling:** Tailwind CSS, Bootstrap, CSS3, SCSS/SASS, Material UI, modular CSS, responsive design, cross-browser compatibility, and CSS architecture
- **Testing:** React Testing Library, Jest, Vue Test Utils
- **Build Tools:** Vite, Webpack, NPM, Git
- **APIs & Integrations:** RESTful APIs, Stripe, Chrome DevTools
- **Accessibility:** WCAG 2.1 Compliance, WAI-ARIA Standards, Semantic HTML, Keyboard Navigation, Screen Reader Compatibility, Color Contrast Testing (Lighthouse)
- **UI/UX:** User research, Wireframing, Prototyping, Design systems, Usability testing, Figma, Adobe XD

Architecture & CMS Expertise

- Worked on scalable frontend architecture and headless CMS-driven solutions for enterprise applications.
- Headless CMS & DXP: Contentful, Contentstack, schema-driven content architecture, modular content rendering
- Experience integrating CMS platforms with React.js / Next.js applications using REST and GraphQL APIs
- Designed reusable component architectures, modular UI structures, and schema-driven content rendering approaches
- Built optimized API integration layers focusing on performance, scalability, and maintainability
- Collaborated with architects, backend teams, and business stakeholders to define technical solutions and delivery standards

- Familiar with cloud deployment workflows, CI/CD pipelines, and enterprise-scale frontend delivery practices
 - Experience working in Agile environments with distributed teams and architecture governance processes
-

Professional Experience

UI Technical Lead – Finova Technologies *(Dec 2020 – Aug 2025)*

Domain: Digital Banking | Loan & Mortgage Solutions

- Acted as UI Architect, owning frontend architecture decisions for enterprise digital banking platforms.
- **Led the front-end development of loan origination and mortgage management systems** for digital banking clients.
- Built **loan summary dashboards, EMI calculators, and repayment tracking** modules using **React.js and Vue 3** Composition API, **Webpack**.
- Designed **reusable components** for application submission, approval workflow.
- **Integrated Stripe** and Plaid APIs for secure disbursement and repayment transactions.
- Developed real-time data visualization for loan performance metrics using REST APIs.
- Optimized overall **UI performance by 40% using lazy loading, code-splitting**, and caching.
- Collaborated with backend and compliance teams to ensure data accuracy, KYC compliance, and PCI-DSS security standards.
- Collaborated with **solution architects** and backend teams to define **API integration structure** and data flow.
- Created **frontend architecture diagrams** and ensured alignment with enterprise design principles.
- Defined **state management strategy** using Redux and Pinia for modular scalability.
- **Mentored junior developers** and enforced coding standards, improving component reuse and maintainability across banking modules.
- Ensured all React and Vue components met **WCAG 2.1 AA** accessibility standards using semantic markup and ARIA roles.
- Collaborated with QA teams to test accessibility via **Lighthouse**.

Sr UI Developer – Espire infolabs *(Dec 2017 – Dec 2020)*

Domain: Enterprise Web Applications | Service-Based Projects

- Developed and maintained enterprise-grade applications for global clients across **education, banking, and retail sectors using React and Vue.js**.
- Led the **complete front-end development of ACU (acu.edu.au)**— a large-scale university website built from scratch using **Vue.js, Bootstrap, and REST APIs**.
 - Designed the architecture and reusable components for **faculty pages, student services, admissions, and course catalog modules**.
 - Implemented **SEO-friendly routing, lazy loading**, and multi-language support (i18n) to enhance global accessibility.
 - Collaborated with backend .NET and CMS teams to integrate APIs for course data, events, and content management.
- Built and enhanced **financial and reporting dashboards** for BFSI clients using Vuex and REST APIs.

- Implemented **ARIA roles** and **keyboard navigation** for dynamic components to improve accessibility across enterprise apps.
- Delivered SEO-friendly and **accessible multi-language** web pages following W3C guidelines.
- **Architected component-driven UI frameworks** for large-scale React and Vue applications.
- Designed **application structure and routing strategy** for multi-language and SEO-friendly sites.
- Created **reusable UI libraries** for consistency and faster development across projects.
- Implemented **architecture governance**, performing code reviews and enforcing best practices.

Sr. HTML Developer – Quasar Media Pvt. Ltd. (Aug 2015 – Dec 2017)

Domain: Service-Based Projects

- Developed and maintained **multiple client-facing** websites using **JavaScript, CSS, and HTML**.
- Built reusable components and optimized front-end architecture for **scalability and performance**.
- Ensured **cross-browser compatibility** and **accessibility compliance** for all web applications.
- Worked in an **Agile environment**, contributing to **sprint planning** and daily stand-ups.
- Designed **modular front-end architecture** for multiple client projects.
- Created **HTML/CSS component standards** to ensure reusability and maintainability.
- Established **UI coding conventions and performance optimization practices**.
- Worked closely with designers and developers to align **UI architecture** with business needs.
- Introduced **responsive design and accessibility standards** into project workflows.
- Documented **frontend structure and best practices** for consistent delivery across teams.

PROJECTS

1. Loan Origination Dashboard (Banking Domain)

- Built a responsive **loan origination dashboard** using **HTML5, SCSS, and JavaScript (ES6)** for real-time loan tracking and approvals.
- Implemented dynamic chart visualizations and EMI calculation modules using native JavaScript and REST API integrations.
- Improved load performance by 35% through CSS optimization, DOM caching, and deferred script loading.

2. Financial Insights Portal

- Developed an analytics-driven portal to display real-time customer insights and loan summaries.
- Designed a **responsive grid layout** using **Flexbox and SCSS mixins** for modular component styling.
- Integrated data visualization widgets with JavaScript and RESTful APIs for seamless data binding.

3. Education Management Platform (ACU Project)

- Created reusable UI components using **HTML5 templates, SCSS partials, and vanilla JS**.
- Optimized accessibility (ARIA labels, keyboard focus) and SEO using semantic HTML5 structure.
- Ensured WCAG 2.1 AA compliance for multi-language student and faculty dashboards.

4. Mortgage Calculator and EMI Simulator

- Engineered a standalone **mortgage and EMI simulator** using pure **JavaScript** for real-time calculations.

- Applied **CSS3 transitions and flex-based layouts** for interactive and mobile-friendly design.
 - Reduced calculation latency by 50% with optimized event handling and DOM manipulation.
-

EDUCATION

Bachelor of Computer Applications (BCA), Jodhpur National University – 2016

Professional Degree - Multimedia and fine arts

ONSITE EXPERIENCE

U.S., 3 months. | **Singapore**, 3 months. | **Australia**, 6 months.
